Introduction

Premium rates summary

We're resuming our transition approach to our rate-setting model in 2022 after holding 2021 rates steady at 2020 levels to support businesses during the COVID-19 pandemic.

This means businesses eligible for a reduction will continue to see decreases to their premium rate. Businesses with projected increases due to their individual and/or class risk and experience will move up a maximum of one risk band from their prior year risk band (approximately five per cent) toward their projected premium rate.

The average premium rate in 2022 will be \$1.30, which is 5.1 per cent lower than in 2021 and 2020, and half the average premium rate in 2016 (\$2.59). We continue to be in a surplus position despite the challenges of the COVID-19 pandemic.

Establishing premium rates

Investment earnings and premium rates applied to Schedule 1 businesses' insurable earnings fund our workplace safety and insurance system for Schedule 1 businesses. Not all Schedule 1 businesses are charged the same rate. Each business is assigned to a class/subclass aligned with the North American Industry Classification System (NAICS) based on the type of work they do. Businesses with more than one business activity are classified according to their predominant business activity – the business activity with the highest amount of insurable earnings.

Each class/subclass has a different premium rate reflecting the average risk of the business activities insured in that class/subclass. More details on classification are available in our [Employer Classification Manual](#).

The average 2022 premium rate reflects lower New Claims Cost (NCC) as well as the elimination of the NCC margin and revenue adjustment margin. The administration component increased slightly, mainly due to increased legislative obligations.

Determining 2022 rates

We calculate premium rates annually to reflect businesses' ongoing experience and our latest financial requirements and targets. Under our rate-setting model, each of the 35 classes/subclasses has a series of risk bands and each risk band has an associated premium rate, either above or below the 2022 class rate.

The 2022 class rate represents the premium rate a business would pay based on the collective risk profile for all the businesses within the class and the class's shared responsibility to maintain the insurance fund. If the 2022 class rate changes as a result of that class's overall claims experience, it will affect the other risk band rates within that class.

Each business is assigned to a projected risk band that best represents its risk in relation to other businesses in its class. The difference between successive risk band rates is approximately five per cent.

We continue to determine projected rates based on the following two-step approach to set and adjust premium rates for businesses:

Step one: setting the class rate for each industry class/subclass based on their risk and share of responsibility to maintain the insurance fund.

Step two: setting the projected rate for each business based on its individual claims history compared to the rest of the businesses in the class/subclass. This means a business's projected rate will reflect their individual claims experience and risk compared to other businesses in their class/subclass.

To help businesses prepare for any projected rate increases or decreases in our new model, rate movement is subject to transition rules during the transition period (defined in our [Transition to the Rate Framework](#) policy) and regular risk band movement rules thereafter. This approach will help businesses better plan for the future and participate in programs that can help improve their health and safety experience.

Businesses in a given class that fall under the same projected risk band have similar risk profiles and will have the same projected rate.

The following rates are determined for each business:

1. Projected premium rate: the rate the business would pay if there were no limits in risk band movement. This rate reflects the business's individual claims cost experience relative to the class to the extent the business's experience is predictable (or credible).
2. Prior year rate: in 2022, this will be the 2021 actual premium rate businesses paid, excluding the [mine rescue modifier](#).
3. Actual premium rate: the rate a business will pay after applying the risk band movement limits defined by the [Employer Level Premium Rate Setting](#) policy to the prior year rate towards the projected premium rate after the transition period. In 2022, we'll apply the [Transition to the Rate Framework](#) policy in terms of risk band movement limitations.

We used the following process to determine 2022 rates:

1. Determine overall Schedule 1 average rate: \$1.30 for 2022 premium year.
2. Determine a fair cost (i.e., claims-based cost) for each NAICS class/subclass that recovers the required premium amount in total for the whole of Schedule 1.
3. Determine the 2022 class rate for each class that recovers the necessary premium based on insurable earnings distribution by risk band. The 2022 class rates and their

corresponding risk band premium rates are included in the [2022 class rates for risk banding](#) and [table of risk band rates](#) sections.

4. Determine businesses' projected risk band and projected rate based on their experience relative to the class.
5. Determine the prior year band for each business by placing the prior year rate into the 2022 risk band structure. We determine the prior year risk band and its corresponding prior year rate using the table of risk band rates.
6. Compare the projected risk band for each business with the prior year risk band and apply transition rules. Transition rules (one risk band increase, all decreases applied to reach projected risk band for 2022) will determine the business's actual risk band and its corresponding actual rate.
7. Adjust actual rates as needed to recover transition costs.

Read our [Employer Level Premium Rate Setting](#) policy for more details on premium rate setting.

The WSIB's Board of Directors approves the average Schedule 1 premium rate, class rates and rules for determining the actual premium rates. Premium rates are expressed as a dollar amount per \$100 of insurable earnings.

Premium components

Premium rates include an amount for:

1. NCC – this covers the projected total future cost of injuries or illnesses expected to arise during the upcoming year, including any additional margins the WSIB may require.
2. Administration expenses – this is the cost required to administer the workplace compensation system in Ontario and fulfill legislative obligations.

The premium components reflect the total premium requirements for all Schedule 1 businesses. Each class/subclass's premium rate includes an NCC and administration expense amount, which is allocated based on claims experience and insurable earnings data from the most recent six years. For the 2022 projected rate, this is 2015 through 2020. The class/subclass premium rate components section includes additional detail.

The Ontario government amended the *Workplace Safety and Insurance Act* on September 24, 2021 to change the 2022 maximum insurable earnings ceiling to \$100,422, providing further support to businesses dealing with the financial impact of the COVID-19 pandemic.

This maximum ceiling is 3.2 per cent higher than the 2021 maximum insurable earnings ceiling of \$97,308.

Classification scheme and data sources

Businesses are assigned one or more six-digit codes adapted from NAICS classes/subclasses based on their business activities. The majority of businesses will have a single business activity. Those with more than one business activity will be classified according to their predominant business activity.

Businesses with distinct and unrelated business activities can request multiple classes/subclasses and are eligible if they meet the WSIB's multi-rating policy criteria. See our [Single and Multiple Premium Rates](#) policy for more information.

Certain businesses are classified using an alternative approach due to their unique circumstances based on the workplace safety and insurance system. This includes [non-exempt partners and executive officers in construction](#).

These special cases are relevant only for industry classification by the WSIB but not to broader economic analysis. The NAICS system does not recognize this alternate treatment, so we established additional six-digit class/subclass codes to handle classification of these businesses.

The figures shown in this manual are based on the data available as of January 2021. [Contact the WSIB](#) if you have any questions or need more information.

Our role

The WSIB is a statutory corporation created by an Act of the Ontario Legislature in 1914. The WSIB is responsible for administering the *Workplace Safety and Insurance Act*. The WSIB receives no government funding. We are funded solely through premiums paid by businesses insured by us and through returns on invested assets.

We help support people and businesses affected by workplace injuries and illnesses – providing a comprehensive bundle of insurance benefits as set out in the Act and helping people recover and return to work by:

- providing benefits to people who become injured or ill at work and the dependents of people who have died as a result of a workplace injury or illness
- assisting in the return to work and recovery from work-related injuries or illnesses

Businesses covered by the *Workplace Safety and Insurance Act* are divided into two groups, referred to as Schedule 1 and Schedule 2. This manual pertains to Schedule 1 businesses only.

2022 table of risk band rates

We began using risk bands as part of setting premium rates in 2020. This process relies on pre-defined tables of risk band rates. There is one table applicable to each of the 35 classes/subclasses adapted from the North American Industry Classification System (NAICS), which includes the following:

- the risk band
- the associated range of risk profile index values (risk profile index from and risk profile index to)
- the risk band rate factor
- the risk band premium rate, which equals the 2022 class rate (risk band 60 in the risk band tables) times the risk band rate factor

To determine the projected rate, the maximum risk band for any class/subclass is 83 (i.e., 23 risk bands above the class rate's risk band). The maximum premium rate for risk band 83 differs by each class. The minimum premium rate for 2022 is \$0.07 and the lowest risk band for any class/subclass cannot have a rate below \$0.07. This minimum premium rate applies to all classes, but the minimum risk band differs by class.

We also use the risk band tables to determine the prior year risk band (or starting point risk band) with no limitations. We use the following general rules, which can be used to expand the table; they are the same rules we used to develop the 2021 risk band tables:

- For risk bands below the class rate, the rate factors will be determined by applying a five per cent discount to the risk band factor of the risk band above. This means the risk band factor is 95 per cent of the risk band factor for the next band up. The risk band factor will be the lower limit of the risk profile index range.
- For each risk band above the class rate, the rate factors will be determined by applying a five per cent increase to the risk band factor of the risk band below. This means the risk band factor will be 105 per cent of the risk band factor for the next band down. The risk band factor will be the upper limit of the risk profile index range.
- The risk band rate equals the class rate times the risk band rate factor.

Transition to our new model

We're staggering initial projected rate increases over time to help businesses smoothly transition to our rate-setting model.

We're resuming the transition approach to our rate-setting model in 2022 after keeping rates steady in 2021. This means businesses that are eligible for a reduction will see decreases to their premium rate and there will be lower yearly maximums on increases until our new rate-setting policies are fully in effect.

2022 transition funding

The transition funding adjustments are applied to those businesses that are eligible for decreases in order to achieve revenue neutrality. However, we ensure businesses that are entitled for a decrease will see at least one risk band decrease after we apply transition funding.

The transition cost modifiers in 2022 are a result of applying the following rules:

- A business will move down one risk band from the starting point risk band if the projected risk band is less than six risk bands lower than the starting point risk band
- Transition funding will be 27 per cent multiplied by the projected rate before modifiers if the projected risk band is six or more risk bands lower than the starting point risk band

We'll only apply transition funding adjustments during the transition period. This will come to an end in 2024 when our regular premium rate setting policies will be fully in effect.

Refer to our [Employer Level Premium Rate Setting](#) and [Transition to the Rate Framework](#) policies for more information on transitioning to our new model.

Definition of 2022 class premium rate components

New Claims Cost

1. New Claims Cost

This covers the projected total future cost of injuries expected to arise in 2022.

Administration expenses

1. Administrative expenses

The estimated expenses for us to administer the *Workplace Safety and Insurance Act* in 2022.

2. Legislative obligations

The expenses we must fund under the *Occupational Health and Safety Act*, the Workplace Safety and Insurance Appeals Tribunal, Office of the Employer Advisor, Office of the Worker Advisor, Health and Safety Associations and research in 2022.

3. Total admin expenses

The total administrative and legislative obligations expenses. This is the cost required to administer the workplace compensation system in Ontario and fulfill legislative obligations.

Past Claims Cost

1. Past Claims Cost

Historically, this charge was intended to recover our unfunded liability. It's zero in 2022 and is not expected to appear in future years when Schedule 1 is fully funded.

Premium rate

Total cost per \$100 of insurable earnings required to fund new claims, administrative expenses, and past claims.

Premium rate setting allocation rules for class/subclass

New Claims Cost

Each class/subclass may see changes in its New Claims Cost (NCC) from year-to-year. The NCC is determined first for six “super classes” – groups of classes/subclasses in similar broad economic sectors – to minimize volatility. They’re then distributed over the classes/subclasses in the super class group using their claims cost ratios (CCR).

The CCR for each class/subclass is compared to the CCR of its corresponding super class. The CCR is the ratio of six years of costs to six years of insurable earnings. The CCR used is the average of the CCRs for the last three calendar years, to enhance stability.

The super classes are defined as follows in 2022:

Class/ subclass	Class/subclass description	Super class
A	Agriculture	Other industries and services
B	Mining, quarrying and oil and gas extraction	Other industries and services
C	Utilities	Public sector
D1	Educational services	Public sector
D2	Public administration	Public sector
D3	Hospitals	Public sector

New businesses

A new business is assigned one or more six-digit codes adapted from NAICS at registration according to their business activities. The business's predominant class is determined at that time.

Businesses with coverage in Schedule 1 for less than 11 months in the review period are considered new businesses – subject to the transition rules applicable to all businesses – until there is sufficient accident cost and insurable earnings information to calculate their risk profile in the review period, so we can calculate a premium rate relative to the class rate. Please refer to our [Employer Level Premium Rate Setting](#) and [Transition to the Rate Framework](#) policies for further details. The review period for 2022 covers 2015 to 2020. In 2022:

- New businesses opened in 2021 and 2022 are assigned the 2022 class premium rate of their predominant class.
- New businesses opened between February 1, 2020 and December 31, 2020 will also pay the 2022 class premium rate of their predominant class, with the exception of Temporary Employment Agencies, which would follow their transition approach.
- New businesses are not subject to transition charges.

Our premium rate-setting model ensures that all new businesses take part in the premium rate setting process as soon as possible.

Multi-rated businesses

Businesses that operate distinct and unrelated business activities can request multiple classes/subclasses and are eligible if they meet the WSIB's multi-rating policy criteria. Refer to our policy on [Single and Multiple Premium Rates](#) for more information.

Class rates reflect minimal multi-rating. Classification shifts due to multi-rating will be reflected as part of any annual adjustments to class rates.

Non-exempt partners and executive officers in construction

Since 2020, non-exempt partners and executive officers in construction who were previously classified under rate group 755 continue to receive a separate premium rate. This premium rate reflects the low risk of their work in comparison to the rest of the construction industry. We assign the same premium rate to all non-exempt partners and executive officers in construction each year, although they are classified under any one of the five construction subclasses depending on their construction business's operations. The 2022 rate for this group is the same as the rate in 2021, \$0.12 per 100 of insurable earnings.

The 2022 premium rate considers the collective experience of all non-exempt partners and executive officers in construction as if they were a single business in the construction subclass with the highest percentage of insurable earnings and applies our rate-setting formula to it. See our policy on [Employer Level Premium Rate Setting](#) for more information.

The construction subclass with the highest percentage of insurable earnings from non-exempt partners and executive officers in construction in 2022 is G4 Building Equipment Construction, based on insurable earnings from 2018, 2019 and 2020. The chart shows the distribution of insurable earnings among construction subclasses from 2018 – 2020.

Predominant class	2018 insurable earnings (in millions)	2019 insurable earnings (in millions)	2020 insurable earnings (in millions)	2018 - 2020 insurable earnings (in millions)	%
G1	\$83.6	\$83.2	\$78.4	\$245.2	14%
G2	\$38.1	\$38.7	\$37.5	\$114.2	7%
G3	\$92.5	\$94.0	\$92.7	\$279.3	16%
G4	\$126.5	\$131.2	\$136.2	\$393.8	23%
G5	\$124.3	\$129.6	\$136.5	\$390.4	23%
G6	\$74.7	\$75.5	\$84.4	\$234.6	14%
Pure rate group 755	\$12.1	\$12.9	\$10.6	\$35.6	2%
Total	\$551.9	\$565.1	\$576.4	\$1,693.3	100%

Predominant class is determined for each business by considering construction business activities only. Class G4 is the construction subclass with the highest percentage of insurable earnings from non-exempt partners and executive officers in construction.

Steps for calculating the 2022 non-exempt partners and executive officers rate

Actual rate before modifiers (your rate)

The 2022 non-exempt partners and executive officers in construction actual rate was \$0.12. This actual rate is unchanged from 2021. The actual risk band has increased by one risk band towards the projected risk band, but the corresponding risk band rate stayed the same. The projected rate shown in the table is for illustrative purposes.

We applied transition rules, as for any other business:

- the following is the derivation of the projected premium rate that shows the future direction in this premium rate if there is no change in the group and class experience from year-to-year
- the classification of claims in the non-exempt partners and executive officers in construction group are frequently reviewed to confirm their classification

Predictability 90 per cent (for all non-exempt partners and executive officers in construction rated as a single business)

Six-year total insurable earnings	\$3,243,985,692.86
100% insurable earnings predictability standard (12,000 x \$100,422)	\$1,205,064,000.00
Actuarial predictability of insurable earnings (capped at 100%)	100.000%
Six-year claim count	62
100% allowed claim count predictability standard	1,200
Actuarial predictability of total number of allowed claims (capped at 100%)	22.730%
Predictability value = 75% based on insurable earnings + 25% based on total number of allowed claims	80.683%
Actuarial predictability (arrived by locating the predictability value in the predictability scale)	90%

Greater employer accountability mechanism

Businesses in a class/subclass who have poor experience on a consistent basis become a potential candidate for further engagement on their health and safety and return-to-work practices. They could receive a significant rate increase three years after being identified as a potential candidate if they don't participate or can't show improvement.

The mechanism addresses two types of concerns for outliers:

- 1) encouraging strong health and safety and return-to-work practices
- 2) providing additional warranted premium equity

Businesses can find their eligibility for this mechanism under "Section B – Your rate before modifiers" of their annual extended statement. The mechanism wasn't applied in 2022 and there was no impact on premium rates. Refer to our policy on [Employer Level Premium Rate Setting](#) for more information.
